TABLE OF CONTENTS

1.0 INTRODUCTION **2**

2.0 TURBULENCE AND THE NEED FOR MODELING **2**

3.0 CLASSIFICATION OF TURBULENCE MODELS **2**

4.0 DESCRIPTION OF TURBULENCE MODELS **2**

4.1 Prandtl's Mixing Length Model 2

4.2 Spalart–Allmaras Model 2

4.3 Standard k–ε Model 2

4.4 RNG k–ε Model 2

4.5 Realizable k–ε Model 2

4.6 Standard k–ω Model 2

4.7 SST (Shear Stress Transport) k–ω Model 2

4.8 Reynolds Stress Model (RSM) 2

4.9 Smagorinsky LES Model 2

4.10 Dynamic Smagorinsky Model 2

4.11 Detached Eddy Simulation (DES) 2

4.12 Scale-Adaptive Simulation (SAS) Model 2

5.0 COMPARISON OF TURBULENCE MODELS **2**

1.0 INTRODUCTION

2.0 TURBULENCE AND THE NEED FOR MODELING

3.0 CLASSIFICATION OF TURBULENCE MODELS

4.0 DESCRIPTION OF TURBULENCE MODELS

4.1 Prandtl's Mixing Length Model

4.2 Spalart–Allmaras Model

4.3 Standard k–ε Model

4.4 RNG k–ε Model

4.5 Realizable k–ε Model

4.6 Standard k–ω Model

4.7 SST (Shear Stress Transport) k–ω Model

4.8 Reynolds Stress Model (RSM)

4.9 Smagorinsky LES Model

4.10 Dynamic Smagorinsky Model

4.11 Detached Eddy Simulation (DES)

4.12 Scale-Adaptive Simulation (SAS) Model

5.0 COMPARISON OF TURBULENCE MODELS
